### What are Data Structures?

#### Data Structure<sup>1</sup>

A way in which data are stored for efficient search and retrieval. Different data structures are suited for different problems.

- ▶ Data type ≠ data structure
- ▶ java.util.HashSet vs. hash table
- array vs. array

<sup>&</sup>lt;sup>1</sup>Encyclopædia Britannica

# Outline

1 Introductory Data Structures

Array

Linked List Hash Table

- 2 Java Collection API & Map API Java Collection API Java Map API
- Advanced Data Structures
  Stuff...

#### Definition

- ► An indexed set of related elements.<sup>2</sup>
- ► An assemblage of items that are randomly accessible by integers, the index.<sup>3</sup>
- ► Example: linear array

<sup>&</sup>lt;sup>2</sup>Oxford Dictionary

- 3 Advanced Data Structures Stuff. . .

#### Definition

A linked list is a data structure in which the objects are arranged in a linear order. Unlike arrays in which the linear order is determined by indices, the order is determined by a pointer in each object.<sup>4</sup>

- ▶ Different types: singly, doubly, multiply, circular, . . .
- Example: doubly linked list

<sup>&</sup>lt;sup>4</sup>Introduction to Algorithms By Cormen, Leierson, Rivest & Stein

- ▶ add/remove first/last

- ► get/insertAt
  - . 1 00
- ▶ indexOf

#### **Operations**

- ▶ add/remove first/last O(1)
- ▶ get/insertAt O(n)
- ▶ indexOf O(n)

## Linked List

- ▶ add/remove first/last O(1)
- ▶ get/insertAt O(n)
- ▶ indexOf O(n)

# Outline

1 Introductory Data Structures

Array Linked List Hash Table

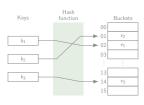

- Java Collection API & Map API Java Collection API Java Map API
- Advanced Data Structures
  Stuff. . .

#### Definition

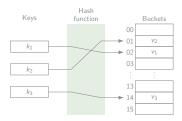

A dictionary in which keys are mapped to array positions by hash functions.<sup>5</sup>

- ► Hash functions: determinism, uniformity, defined range, data normalisation, non-invertible, perfect, . . .
- ▶ Collisions resolution: chaining, open addressing, . . .
- Example:

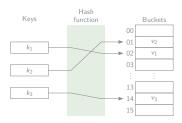

<sup>&</sup>lt;sup>5</sup>National Institute of Standards & Technology

- ▶ put
- remove
- ▶ get

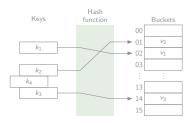

- ▶ put
- remove
- ▶ get

 $put(0_4)$ 

- ▶ put
- remove
- ▶ get

 $put(0_4)$ 

- ▶ put
- ► remove
- ▶ get

 $put(0_4)$ 

## Operations

▶ put

- O(1) / O(n)
- remove
- ▶ get

 $put(0_4)$ 

## Operations

▶ put

- O(1) / O(n)
- remove
- ▶ get

 $remove(O_2)$ 

## Operations

▶ put

- O(1) / O(n)
- remove
- ▶ get

 $\texttt{remove}(\mathbb{O}_2)$ 

## **Operations**

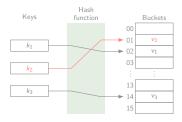

▶ put

- O(1) / O(n)
- remove
- ▶ get

 $\texttt{remove}(\mathbb{O}_2)$ 

- ▶ put O(1) / O(n)
- remove O(1) / O(n)
- ▶ get

 $remove(O_2)$ 

- ▶ put O(1) / O(n)
- ▶ remove O(1) / O(n)
- ▶ get

 $get(O_2)$ 

- ▶ put O(1) / O(n)
- remove O(1) / O(n)
- ▶ get

 $get(O_2)$ 

- ▶ put O(1) / O(n)
- ▶ remove O(1) / O(n)
- ▶ get

 $get(O_2)$ 

- ▶ put O(1) / O(n)
- ▶ remove O(1) / O(n)
- ▶ get O(1) / O(n)

 $get(O_2)$ 

- ▶ put O(1) / O(n)
- remove O(1) / O(n)
- ▶ get O(1) / O(n)

### Tree

#### Definition

A data structure made up of nodes or vertices and edges without having any cycle. A tree that is not empty consists of a root node and potentially many levels of additional nodes that form a hierarchy.

- Depth, binary, (nearly) complete, . . .
- Example:

### Tree

#### Definition

A data structure made up of nodes or vertices and edges without having any cycle. A tree that is not empty consists of a root node and potentially many levels of additional nodes that form a hierarchy.

- Depth, binary, (nearly) complete, . . .
- Example:

# Binary Heap

### Definition (Heap)

A complete tree where every node has a key more extreme (greater or less) than or equal to the key of its parent.<sup>6</sup>

### Definition (Binary Heap)

A binary heap data structure is an array object that we can view as a nearly complete binary tree that satisfies the min-heap or max-heap property.<sup>7</sup>

<sup>6</sup> National Institute of Standards & Technology

Introduction to Algorithms By Cormen, Leierson, Rivest & Stein

- ▶ Parent(n)  $\lfloor \frac{n-1}{2} \rfloor$
- Left(n) 2n+1
- ▶ Right(n) 2(n+1)

add (8)

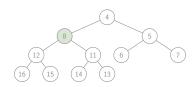

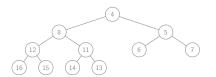

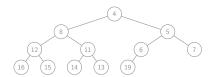

add (19)

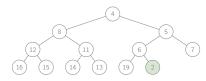

add 2

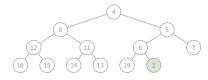

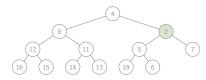

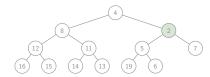

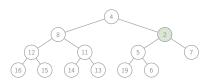

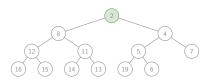

poll

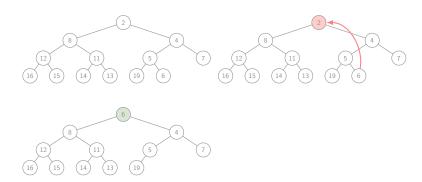

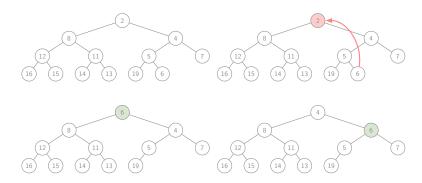

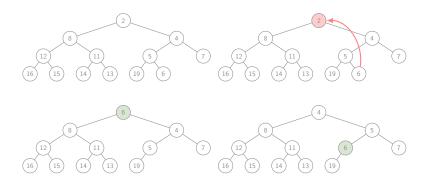

#### Operations

- ► insert
- ► removeAt
- peek
- ▶ poll

#### **Operations**

- insert  $O(\log n)$
- ▶ removeAt  $O(\log n)$
- ightharpoonup peek O(1)
- ▶ poll  $O(\log n)$

#### Operations

- ▶ insert  $O(\log n)$
- ightharpoonup removeAt  $O(\log n)$
- ▶ peek O(1)
- ▶ poll  $O(\log n)$
- Heapsort
- Frequently used in Priority Queues
